### To Whom It May Concern

Electrinet has maintained the Gisborne District Street Light Network since 2004.

This work has involved routine, periodic and emergency maintenance on a network of nearly 4000 street light installations, mounted on power poles and stand alone poles, together with the cabling from the supply points.

The network includes the Gisborne City urban area, rural townships, amenity and reserves lighting and isolated State Highway intersections.

Electrinet staff work with a Professional Services Engineering Contractor PSL to provide a design and build service to Gisborne District Council.

Throughout this time Electrinet have provided a timely, proactive response.

A handwritten signature in black ink that reads "Robin Beale". The signature is written in a cursive, flowing style.

Robin Beale
